

Rotary Pulser Module

The Rotary Pulser is the toughest, most advanced mud pulse transmitter in the industry. Our Rotary Pulser chews through LCM content which would choke any other pulser, over a wide range of mud weights and bottom hole conditions.

PRODUCT SPECIFICATIONS

Temperature Range	<175 C/ 347 F
Maximum Working Pressure	<20,000 PSI
Signal Transmission	Positive Mud Pulse
Fixed Mount	Yes
Flow Ranges	70 - 1200 GPM
Sand Content	<1% by volume recommended, 3% by volume maximum
LCM Tolerance	40 - 50 lb/ bbl evenly mixed, any size
